

ATEK's Level IIIA Flexible Ballistic Door Panels exceed NIJ standards for multi-round protection. This easy to install panel uses our proprietary Protek™ and Graphtek™ Nano microfiber technology and delivers a lighter and stronger vehicle door ballistic solution. Our proprietary design optimizes the coverage area for each unique make and model. The concealed and weatherproof panels are made for both driver and passenger side doors for the industry's top vehicles. Rigorous testing ensures maximum safety and peace of mind, so you can respond with confidence in any situation.
